MAVIC

COMETE ULTIMATE MIPS

Shaped for speed, this race-winning road helmet gives you an edge with all-day comfort and added safety features.

Exclusive combination of safety technologies for maximum protection.

- Combination of EPS-4D and MIPS.
- EPS-4D technology for up to 30% better shock absorption than regular EPS construction.
- MIPS technology can reduce rotational motion transferred to the brain from angled impacts to the head.

Race-ready with the best combination of aero shape and ventilation.

- Aero-optimized shape minimizes wind drag. Airflow channels and vents engineered for maximum ventilation.
- Carbon reinforcement for extra large rear vent.

Comfort for all-day rides.

- Live Fit technology delivers an adaptive fit without compromising on weight using XRD® memory foam.
- Exclusive Autofit system offers perfect no-fuss chin strap adjustment.
- Superlight retention system offers optimal adjustability, comfort and head hold.

WEIGHT (G) / SIZE	260 / M
-------------------	----------------

FEATURES

HOT RIDE+ SL GRAPHIC TEE

Our lightest, close-fitting, sleeveless base layer is made with recycled yarns to keep you cool and comfortable whether you're riding outside on warm days or training indoors.

Stay cool and dry in the hottest temperatures

- Exceptionally breathable 3D mesh enhances airflow for excellent moisture management.
- The 3D mesh is made with recycled polyester that wicks sweat and dries quickly.

Engineered pattern making

- Ergonomic flatlock seams on shoulders eliminated added layer or bump beneath bib short straps or a jersey.
- Armhole depth is wide enough to reduce chaffing and boost breathability.
- Minimalist finishing on bottom hem saves weight and reduces thickness for comfort.

Stylish

- Graphic print makes a style statement when jersey is unzipped or when it's worn on its own.
- Design is inspired by mountain switchbacks with a subtle color gradient.

FEATURES

FABRICS

MAVIC

NEW COSMIC JERSEY

This high-performance eye-catching jersey is lightweight, comfortable and breathable for warm-weather riding.

Cool and comfortable

- Highly breathable, quick-wicking, fast-drying fabric encourages air flow, keeping you from overheating
- Supple fabric feels soft to the touch makes it very comfortable to wear, thanks to a second skin effect

Ideal fit for all body shapes

- Highly stretch fabric able to accommodate different body shapes
- Slightly more relaxed fit compared to previous versions with long bonded sleeves

Exclusive features and style

- 3 rear pockets and 1 zipped pocket for easy access and security to your ride essentials
- Expandable pockets sit away from the body when fully packed
- All round elastic comfortably prevents jersey from riding up
- Various different graphic applications highlight either the roots of Mavic with the black and yellow stripes, or the french touch as a nod to the french flag on the dark blue jersey

ESSENTIAL JERSEY

The Essential summer jersey delivers a cool, comfortable feel and a superior fit that's perfect for your daily ride routine.

Stay cool, dry and comfortable.

- Main body material is comfortable against the skin and wicks away sweat quickly and effectively.
- Sleeves and side panels made with high-performance stretch fabric that increases the cooling effect.

Functional features for daily road riding comfort.

- Glued hem on sleeves and bottom comfortably grip your body.
- Three cargo back pockets, including a special pump pocket inside one.
- Reflective highlights to add visibility in low-light conditions.

Great fit for all body shapes.

- Made with our «Regular Fit» so it's suitable for all body shapes.
- Silicone elastic on back of the waist comfortably holds jersey in place.

COSMIC ULTIMATE II BIBSHORT

This improved version of our lightest bib short delivers optimal muscle support without compromising freedom of motion and has a reworked chamy for a close, comfortable saddle feel with less bulk.

Muscle support without compromising freedom of movement

- Stretch-woven fabric provides effective muscle support and vibration-damping for long rides.
- Advanced material is made with elastane yarn wrapped twice with polyamide yarns.
- Woven fabric is 20% lighter than standard knit fabric.

Firm yet supportive chamy for close saddle connection and less bulk

- Multi-layer chamois with 3 different densities featuring Ortholite® memory foam for a close saddle connection and less bulk.
- Ortholite® memory foam under ischial areas increases shock absorption by 20% compared to a standard insert.
- High-performance, next-to-skin fabric offers improved moisture management.

Stay cool in hot conditions

- Pre-shaped pattern provides extra air flow.
- Bonded, low-profile bib construction is cut below the navel for maximum ventilation.
- Broad elastic straps positioned for optimal expansion of the ribs and diaphragm.
- Special material dries twice as fast as standard material, offering superior moisture management.
- Each yarn is coated, resulting in a lighter weight fabric that absorbs less moisture and is more breathable.

FEATURES

COSMIC II BIBSHORT

Designed for comfort, support and superior fit, this bib short features our Ergo Contact insert, providing a close connection to the saddle that gives you comfort and control without added bulk.

Close saddle contact and support without added bulk

- Multi-layer Ortholite® memory foam chamois with 3 different densities for those who prefer a close saddle connection.
- Memory foam under ischial areas increases shock absorption by 20% compared to a standard pad.
- High-performance next-to-skin fabric offers improved moisture management.

Comfortable, snug leg hold

- Durable, light-support fabric with high elasticity ensures a comfortable hold on your legs while pedaling.
- 4-way stretch fabric engineered for maximum elasticity and abrasion resistance.

Technical details elevate comfort and style

- Elastic bib straps comfortably accommodate various body shapes and sizes.
- Raw-cut edge on leg bottom with silicon offers comfortable grip.
- Rear reflective elements add visibility in low-light conditions.

ULTIMATE XC

This high-performance off-road shoe delivers best-in-class power transfer for XC, cyclocross or gravel racing. Superlight with a precise fit, it's the best way to feel totally connected to your bike.

Superior power transfer

- Full carbon sole is laid up by hand with uni-directional carbon fiber then embedded with epoxy thermo resin for superlight weight, stiffness and power transfer.
- External heel-counter and memory foam liner offer a super secure heel hold.
- Matryx® overlap upper keeps the foot stable for maximum power transfer and a snug, comfortable fit across all areas of the foot.
- Low-profile collar around the ankle offers maximum range of motion.

Superlight weight

- Made with our lightest carbon outsole for efficient climbing and acceleration.
- Matryx® upper eliminates excess material, offering more support with less weight.
- Overall weight is less than 300g.

Precise fit and connection to the bike

- Two BOA® Fit System IP1 dials offer precision fit and micro-adjustability in 1mm increments, with a quick and easy release system.
- Minimalist rubber platform for maximum support with SPD pedals.
- Compatible with spikes.
